# Island Media Management Developer Test Phase 2
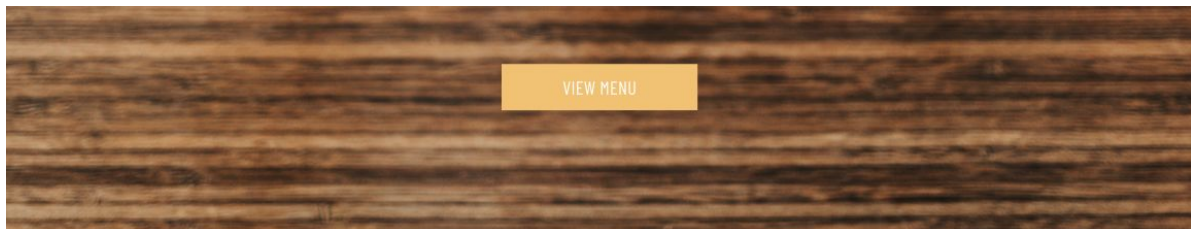

Design Requirements:

- Create a website based on the mockup (*Mockup.pdf*).

- There are also image assets, icons and fonts files available (*Image assets.zip, Icons.zip, Crimson_Text.zip, and Barlow_Condensed.zip*).

- The header will be sticky when scrolled.

- Click View menu will scroll down to the "What would you like to have" section.

- Create a separate JSON file for the content below. Loop the JSON file using PHP for the layout below.
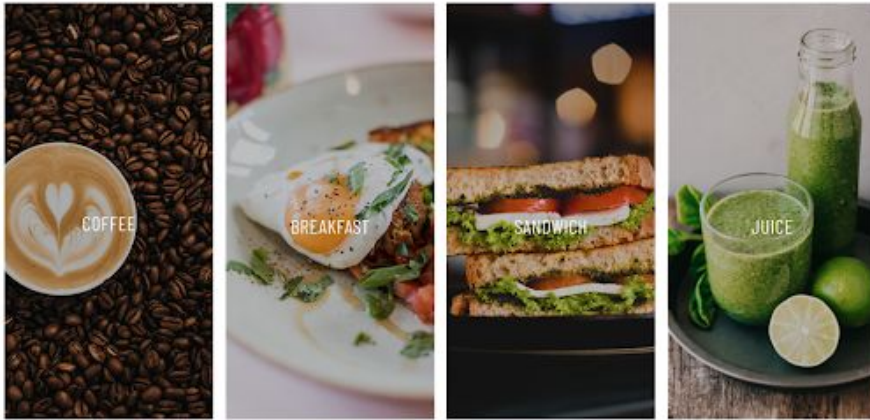

Code Requirements:
- Please compile CSS and JS files using Laravel Mix (https://laravel-mix.com/)
- Please use Sass for CSS writing and ES6 for JS.
- Please use BEM (Block Element Modifier) for CSS class naming method in English.
- Added Scroll animation - animate when the element entering the viewport is a plus (for example using sal.js - https://mciastek.github.io/sal/).
- Upload it to Bitbucket and share your repository to themedebug@gmail.com Bitbucket and notify us when it is shared.
